Global Leader in Electronic Solutions

DBG is one of China's leading contract electronics manufacturing service (EMS) for PCB assemblies and complete turnkey “box builds.”

- Founded in 1995, DBG has over 20 years EMS manufacturing know-how and experience.
- Our factory has a building area of 165,000 square meters. We have 51 SMT lines, 80 product assembly lines, own quality inspection and environmental test equipment in-house to realize your EMS request. We are a reliable electronic contract manufacturing services partner.
- Certification of quality management system obtained: IOS9001, IATF16949, ISO14001, BS OHSAS18001, SA8000, ISO13485
- Value-added services to our customers can be summarized in the short form: "Q · C · D · S · E", that is “high Quality, low Cost, time Delivery, first-class Service and Environmental friendly products" offer to our customers. DBG is committed to providing customers with reliable, safe and environmental friendly products and services.

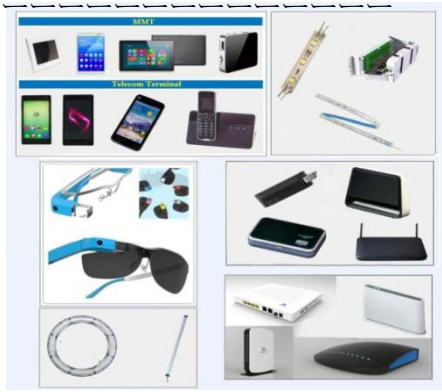
SMT and PCBAs services

A wide variety of products, plus flexibility to support production in a short deivery time.

DBG provides one-stop solution: from parts procurement – production – inspection / packaging - customs clearance - logistics to after-sales services.

We introduced quality inspection and environmental test equipment to ensure our quality commitment in our production.

RoHS, REACH, TPS, 6SIGMA, QCC, 5S, etc. are also carried out in our system to meet your demand.



Finished product assembly services:

DBG has rich manufacturing experience of electronic products in many fields such as mobile phone, tablet PC, communication terminal products, IoT products, industrial control equipment, AR / VR wearable products, as well as medical electronic products.

Parts procurement – SMT - finished product assembly - packaging – quality inspection - customs clearance - logistics

We provide total customer satisfaction to our customers.

Automotive products / sub-assemblies manufacturing services:

Automotive certification IATF16949 acquired for manufacturing of automotive products / parts.

Proven track record and experience from parts procurement, production to finished product.
