

At last!

A non animal-derived collagen

Reallagen™

Until now there has been no non-animal alternative that gives the same performance as animal-based collagen.

JLand Biotech presents Reallagen™ collagen: wholly derived from Pichia engineering yeast using our patented high-density fermentation and highly efficient separation and purification process.

Reallagen™ also offers excellent & efficient anti-wrinkle, anti-ageing & anti-UV film forming attributes, while also moisturising, lightening and repairing skin.

Reallagen™ is:

- Safe to use with low immunogenicity and is non-allergenic
- High-performance collagen with excellent biocompatibility - high & uniform transdermal absorptivity
- Economic to use with 200 times the performance of traditional animal-extracted collagen
- Vegan accredited
- EffCI, GMPC, ISO22716 compliant
- Virtually odourless
