**PARABEN FREE**  
**MINERAL OIL FREE**  
**PRESERVATIVE FREE**  
**ALLERGENS FREE**  
**GLUTEN FREE, VEGAN OK**  
**NOT TESTED ON ANIMALS**

**AQUACOLOR** is a *delicate permanent coloring powder*, it does **not contain ammonia and you can mix it simply with water. NO DEVELOPER/PEROXIDE IS REQUIRED!** Its sweet formula does not have lightening effect, but its high tonalizing power allows you to perfectly cover grey/white hair, ensuring a natural, shiny and durable color.

### Preparation:

wear appropriate protective garments: gloves and head cover. Provide with a precision scale to balance and to weight correctly the ingredients. Use potable water for the mixing. For best results: follow closely the instructions on the packaging and the recommended doses in order to weight and to mix the different ingredients and to get the right coloring blend.

### Application:

**First time coloring, regrowth coverage and high percentage of white/grey hair to be covered (more than 30%):** follow the **MIXING RATIO 1:6**. Into non metallic bowl, pour **10 gr** of Aquacolor powder together with **60 ml** of water, then mix it well. Apply the coloured blend onto the hair following the usual hair coloring process. Leave it for 40-45 minutes (depending on the percentage of the grey/white hair to be covered and by the hair absorption capacity). At the end of the laying time, proceed with a suited post-color shampooing, rinse thoroughly, then style as you prefer.

**For subsequent coloring or toning service, application on hair length and low percentage of white/grey hair to be covered (less than 30 %):** follow the **MIXING RATIO 1:10**. Into non metallic bowl, pour **10 gr** of Aquacolor powder together with **100 ml** of water, then mix it well. Apply the coloured blend onto the hair, leave it for 20-25 minutes. At the end of the laying time, proceed with a suited post-color shampooing, rinse thoroughly, then style as you prefer.
