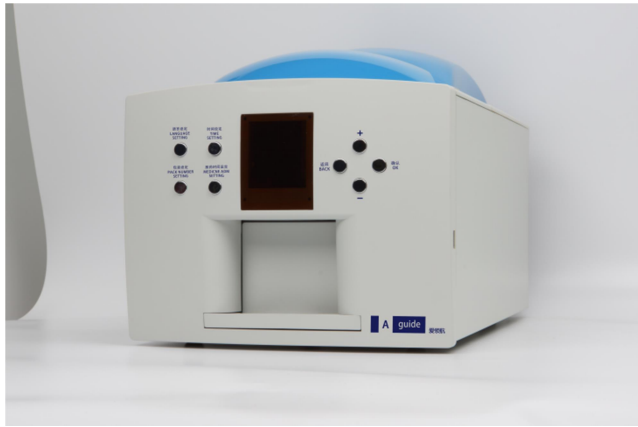
Intelligent Micro Pill Packaging Machine



This world' first and Chinese Patent Intelligent Micro Pill Packaging Machine and Photoelectric Sensor Inductive Pill Box

It is suitable for households, hospitals as well nursing home usage. It is able to package medicines automatically and remind the patients to take medicine, record and store the medicine administration information up to six months.

Intelligent Micro Pill Packaging Machine with Photoelectric Sensor Inductive Pill Box

You will never forget to take pills or prevent you from taking pills more prescribed and it will also help you record the medicine time administrant.

Photoelectric Sensor Inductive Pill Box has a special function

Once the user takes out the first aid pill that will send emergency text messages to the preset mobile phone number, notifying related persons to contact the user in time.

Applying the cutting

Edge of the cloud technology for information recording, tracking and analysis.

Product Series

No.1 The Packaging Machine for Household Use

The packaging machine for household use automatically pack pills. The photoelectric sensor inductive pill box automatically reminds and records the time of taking medicine.

Every day, you are faced with all kinds of troubles such as forgetting, repeating, and failure to take medication on time etc. To solve those problems, all need is this packaging machine with the photoelectric sensor inductive pill box. It's that simple!

- Model AG-1702 and Model AG-1704 have a GPRS module and can send emergency text messages to the preset mobile phone number.
- The machine utilizes cloud technology to record and store the patient's medicine administration history up to six months, which will be sent to the hospital, pharmaceutical factory and research institute to analyze the effect of medicine and develop new products.

No. 2 The Packaging Machine for Hospital Use

The packaging machine for hospital use automatically packs pills and the photoelectric sensor inductive pill box automatically reminds and records the time of taking medicine and summarizing the data for each patient in the hospital.

Every day, you are faced with all kinds of troubles of sub-package the pill accurately and administering them on time and recording the administration time for each patient. To solve those problems, all you need is this packaging machine for hospital use with the hospital use photoelectric sensor inductive pill box. It's that simple!

- Every operation is shows on PC screen and is controlled by keyboard.
- The automatic packaging pill system can pack pills for each patient for morning, noon, evening and bedtime administrations.
- The packing pill system automatically print the pill administration time for each patient.
- The packing pill automatically reminds the patient of medication time and records it.
- The PC query system can keep records for inquiry of each patient's medication history for one year.

No. 3 The Clinic or Nursing Home Use

The clinic or nursing home use packaging machine automatically packs pill and the photoelectric sensor inductive pill box automatically reminds and records the time of taking medicine and summarizing the data for each patient in the hospital, at the nursing home and the community medical center.

- Every operation is shows on PC screen and is controlled by keyboard.
- The automatic packaging pill system can pack pills for the aged for morning, noon, evening and bedtime administrations.

- The packing pill system automatically print the pill administration time for aged.
- The packing pill system automatically reminds the aged of medication time and records it.
- The PC query system can keep records for inquiry of each aged's medication history for one year.
- The PC query system can keep records for inquiry of each patient's medication history up to one year, which will be sent to the hospital, pharmaceutical factory and research institute for analysis and development.

No. 4 The packaging machine for pharmacy use

The packaging machine for pharmacy use automatically packs pills after receiving the order from customers and summarizing the data for each person. It is delivered to users by express.

1, Every operation is shows on PC screen and is controlled by keyboard.

2, The automatic packaging pill system can pack pills for each customer for morning, noon, evening and bedtime administrations.

3, The pack pill automatically prints the pill administration time for every customer.

4, The PC query system can keep records for inquiry of each customer's medication history in one year.

Model and Function of Product

- **Model AG1701**

Model 01 household use packaging machine + Model 01 photoelectric sensor inductive pill box.

The cost-effective model is suitable for the user, who takes medication for a short period of time, often changes medication or need precise tracing for medication. The machine has a good value.

CONFIGURATION		MODEL 01 PACKAGING MACHINE	MODLE 01 PILL BOX
FUNCTION	Unit	1	1
AUTOMATIC PACKING PILL	Day	2	-
PACKING THE FIRST AID PILL	Piece	1	-
STORING PILL	Day	-	2
FIRST-AID SLOT	Piece	-	1

NANO SIM CARD SLOT	Piece	-	-
2G/4G MODULE	piece	-	-
SEND FIRST AID MESSAGE	Time	-	-
BUZZER AND LED FLASHING TO REMIND MEDICATION TIME	Time	-	3
RECORDS OF TIME FOR INQUIRY	Day		180

- **Model AG1702**

Model 01 household use packaging machine + Model 02 photoelectric sensor inductive pill box.

It is suitable for the user with short period of taking medicine, often change to taking medicine, and need height tracking the time of taking medicine, also often to use first aid pill and contact with family members at once.

This model is suitable for the user, who takes medication for a short period of time, often changes medication or need precise tracing for medication. And it also good for those, who need to use first aid pill and contact family number in time.

CONFIGURATION		MODEL 01 PACKAGING MACHINE	MODLE 02 PILL BOX
FUNCTION	Unit	1	1
AUTOMATIC PACKING PILL	Day	2	-
PACKING THE FIRST AID PILL	Piece	1	-
STORING PILL	Day	-	2
FIRST-AID SLOT	Piece	-	1
NANO SIM CARD SLOT	Piece	-	1
2G/4G MODULE	piece	-	1
SEND FIRST AID MESSAGE	Time	-	2
BUZZER AND LED FLASHING TO REMIND MEDICATION TIME	Time	-	3
RECORDS OF TIME FOR INQUIRY	Day	-	180

- **Model AG1703**

Model 02 household use packaging machine + Model 01 photoelectric sensor inductive pill box+ Portable bag.

This model is suitable for the user, who takes medication for a long period of time, rarely changes medication or needs precise tracking for medication takes business trip frequent.

CONFIGURATION		MODEL 02 PACKAGING MACHINE	MODLE 01 PILL BOX	PORTABLE BAG
FUNCTION	Unit	1	1	1
AUTOMATIC PACKING PILL	Day	10	-	
PACKING THE FIRST AID PILL	Piece	1	-	
STORING PILL	Day	-	2	-
EXTENSION STORING PILL	Day	-	-	8
FIRST-AID SLOT	Piece	-	1	-

NANO SIM CARD SLOT	Piece	-	-	-
2G/4G MODULE	piece	-	-	-
SEND FIRST AID MESSAGE	Time	-	-	-
BUZZER AND LED FLASHING TO REMIND MEDICATION TIME	Time	-	3	-
RECORDS OF TIME FOR INQUIRY	Day	-	180	-

- **Model AG1704**

Model 02 household use packaging machine + Model 02 photoelectric sensor inductive pill box+ Portable bag.

This model is suitable for the user, who takes medication for a long period of time, rarely changes medication or needs precise tracking for medication takes business trip frequent. And it also is good for those, who need to use first aid pill and contact family number in time.

CONFIGURATION		MODEL 02 PACKAGING MACHINE	MODLE 02 PILL BOX	PORTABLE BAG
FUNCTION	Unit	1	1	1
AUTOMATIC PACKING PILL	Day	10	-	
PACKING THE FIRST AID PILL	Piece	1	-
