

## **Quanta Exhibits Autonomous Driving Solution at Automotive World Japan 2019**

Taipei, Taiwan, September 26, 2018 – Quanta Computer, one of the leading design and manufacturing companies for automotive solution, is going to showcase the vehicle computing systems, in-vehicle gateway/switch and other automotive solution. Quanta will also give a speech about autonomous driving in Automotive World Japan 2019.

Transportation exists in everyone’s normal life. Making it safer and more convenient is the goal we are pursuing. Quanta has over 30 years’ industrial product design and manufacture experience; quality and reliability assurance are our core value.

Quanta started supplying embedded products since 2007 as an electronic design/manufacturing service provider. We offered in-dash entertainment and navigation devices to the world's leading OEM and tier 1 auto parts suppliers. The expertise we leveraged from system integration among hardware, software, validation and manufacture will sustain capability needed for autonomous car field. Based on our previous integration ability, Quanta now provides car electronic and electrical parts to the key players in both traditional cars and advanced self-driving cars.

Quanta promises to offer strong design and manufacturing capability as well as quality and reliability assurance and will keep focusing on the computing system integration to offer the optimal car architecture to our customers. In Automotive World Japan 2019, Quanta Computer will also deliver a speech “Autonomous driving: high-performance computing solution with functional safety” at East-C in East hall 6 on January 16 at 15:00. Welcome to visit us and join us to explore the automotive world.

### **About Quanta Computer**

Quanta Computer, one of the largest technology companies in worldwide computer industry, is established in 1988 and now focus on cloud, client and connectivity business. Quanta’s revenue was up to 30 billion and listed #390 on the 2017 Fortune Global 500. With leading technology and strong R&D capability, we have achieved worldwide No. 1 notebook PC and all-in-one PC supplier, and also one of the top 3 server suppliers, and now is dedicated on car computing system integration.
