

Very short-delivery,lead time for casting prototype parts  
Kuwahara casting corporation

We will solve your problem.

EX

No	Problem
1	Long-delivery,lead time.
2	You can not find the order destination.
3	You order different companies by a process.

Our company has acquired ISO9001.  
We delivery rapidly high-quality castings.

Manufacturing process

1. Lead time

Process	Lead time
Casting material	Within 10 days
Machining	Within 10 days
Measuring	
Total	Within 20 days

2. Production equipment

100kg High-frequency furnace

Designated Molding place

50kg Aluminum melting furnace

5-Axis Machining Center

3D Measuring Machine

X-ray inspection

We can cast rapidly various materials and complete inspection facilities.

3. Materials,Application

Material Types		Application
Aluminum	AC4A~D,2A,2B,7A	Intake Pipe and more for engine component
FC	200~350	Turbine Hausing,Exhaust Manifold, Bracket,and more for engine component
FCD	400-15~800-2,600-10 Heat resisitant,Ni resistant Wear resistant	
Cast Steel	Heat resistant	Turbine Hausing,Flange Pipe and other
