

The state of the art HLCSLP main plant of Gaolangang base of Kinwong in  
Zhuhai was successfully capped

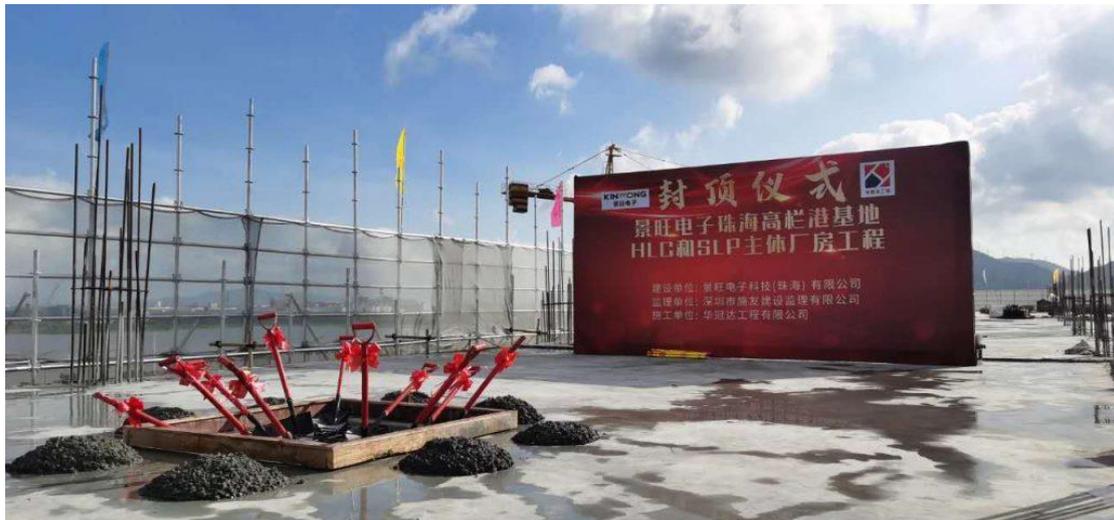

On the morning of July 11, 2020, the state of the art HLC/SLP main plant of Gaolangang base of Kinwong in Zhuhai was successfully capped. Zhuo Yong, Vice Chairman and Liu Yu, Vice President of the group, together with the leaders of the PCB business group and guests from various partners, witnessed this important moment together.

The capping ceremony

At 8:15 A.M., with the salute and fireworks at the site, leaders and guests brandished gold shovels and worked together to pour the last piece of concrete, and the capping ceremony came to a successful end!

The main plant of Gaolangang Base of Kinwong in Zhuhai was successfully capped  
The Zhuhai Kinwong HLC/SLP industrialization project was officially started on October 12, 2019. With thorough planning and deployment of the company, joint efforts of the project team and various partners overcoming the difficulties, many barriers caused by COVID-19 were broken up and the construction target was reached on time with good quality. With 9 months of construction, the engineering of the main plant was completed successfully, demonstrating the perseverance and dedication of Kinwong staff!

### On-site work meeting

After the ceremony, the leading group of the company held an on-site work meeting listening to the work report of the project team. At present, the main part of the project was completed about 90%, and some individual units entered the construction stage of decoration. All the work is being carried out smoothly. On the meeting, leaders gave full affirmation to the project team and extended appreciation to the great support of all partners. Liu Yu, Vice President, stressed his

requirements for the engineering safety and quality again. Zhuo Yong, Vice Chairman, said that the company would do a good job for the promotion of the follow-up project funds. Let's look forward to the completing and running of the Zhuhai Kinwong HLC/SLP industrialization project!

### Introduction to project

The Zhuhai Kinwong HLC/SLP industrialization project plans to build two intelligent plants, one is HLC plant which will have capability of over 60 layers, with 14 layers in average and above, the other one is high-end SLP plant with interconnected random layers and mSAP capacity. Kinwong plans to have deep cooperation and customized development with global leading intelligent equipment manufacturers introducing the cutting-edge automatic, intelligent and IT-based equipment and facilities, embracing the domestic most advanced intelligent manufacturing, lean production, quality control and product development system, and creating a new generation intelligent plant capable of fast turnaround, flexible manufacturing and lean production.
